

CGI-Telnet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

CGI-Telnet allows you to execute commands on your Web Server. It is a useful tool if you don't have telnet/shell access to your server. It is very easy to install and configure. It runs on both Unix and Windows NT. Features include: File Transfers - Upload and Download Files, Command Timeouts - Automatically stop commands after the specified timeout period, Real-Time Output - See the output of commands as it is generated, Security - Login required for running commands, and Support for Automatic logout.
