Generate search engines related marketing reports for web-sites. It finds site's indexed pages, pages linked to a domain, finds out what is the position(rank) of a web-site url in the search engine results listings for a search query. Also you can compare several web domains by ranking for a given search query or compare them by the reported counts of linked to that domains pages. This script supports mod_perl, FastCGI, gzip http compression, http proxies.
