<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The Cheap Scripts Top Sites is a script that will create a list of the top sites that have joined the group. Sites can be added by the user and get a number, a password, and an HTML code. When the user puts the HTML code on their website, their website users can vote for that site from one to ten. You can specify when the script will update (half hour, hour, or 24 hours). The script will generate a list of all of the sites in the group and will organize them by ratings. You also have the option to have the top sites list reset itself every week so that one site can't get too far ahead of other sites.
