

Checkbox Tree in JavaScript

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A compact, fast, reusable script that lets you put checkboxes and radiobuttons inside a tree. Download the JavaScript/DHTML applet for free and configure it with the online visual builder. Features: Use for both showing and entering options and settings in a form; Cross-browser compatible; Unlimited nodes and levels; Does not require Java or cookies; Runs entirely on the client-side; Hooks available for server-side dynamic data.
