

CheckMe

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

CheckMe is a very simple to-use password script (yet powerful), which lets you password protect many of your webpages. You may include an infinite number of people with different passwords and keep them in groups. It also logs every login into a log file. A great Admin Tool comes with this package!
