

Chilkat XML Parser Component

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

High-level non-validating XML parser component that is free for both commercial and non-commercial use. Load/save XML files to an in-memory document object model (DOM). Add name/value attributes to nodes. Compress nodes or entire sub-trees using in-memory Zip compression. AES encrypt the content of a node. Numerous methods for iterating over the nodes in a document. Numerous methods for searching and sorting nodes in a document. API designed to make it easy to do frequently encountered tasks when working with XML. Makes it easy to handle binary data (such as image data) within XML files.
