circeOS XWinServicesManager is a java/jsp application that allows to manage Windows Services from the Web on local and remote machines (check status, start, stop services on Win2K/WinXP). It wraps the functionalities of psservice.exe program (psservice.exe is included in PsTools by SysInternals) invoking it from the web, parsing and visualizing results. circeOS XWinServicesManager is developed using jsp, taglib, a couple of java classes and has XML configuration. circeOS XWinServicesManager is easily integrable in others web applications.
