

# CJ Printer Friendly

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The CJ Printer Friendly script takes the content from a page, usually article or news based and strips it out of its images and other things that annoyingly take up all that valuable printer ink. All you have to do is insert two comment tags within your HTML to tell the script when to start and finish and then link to the script; to do the rest of the work. The printer friendly script has a few variables to change such as site name but you can also change the font by editing the simple stylesheet included. New version includes an anti-leech function.
