

Click Manager

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script can be used to count the number of times a link is clicked, be it a link to an outside site, a download, or anything else. It can also be used to display the number of times a link has been clicked on your site. It can display the number of times one, two, three, etc., or all of the links have been clicked, all added together. It's simple to install: just upload a few files, CHMOD, and it's done. No complicated forms to fill out. Detailed stats and graphs are easy to get to. If you want them to be private, you can make the stats password-protected.
