

Click Portal Server

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Click Portal Server provides a means for companies to rapidly deploy both B2C and B2E e-business applications. Business to consumer portals implemented with the Click Portal Server provide a flexible means for customers to access information of relevance. Information sources throughout the enterprise can be seamlessly integrated with the portal through the Portals modular architecture. Business to employee portals allow corporations to provide a single point of information access to their employees. The Click Portal Server emphasizes on providing a collaborative means for customers to access enterprise wide content sources. Features: User-Based Personalization, Extensible Module Architecture, Group-Based Customization, Group Based Collaboraation, and Rapid Enterprise Integration.
