

Clickr - The link and download counter

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script provides an admin panel where you can overview stats about all links created – stats include total hits, unique visits (determined by IP address), visits in last day/week/month, top referrers and last 5 visits. Use as a download counter! You can output stats about your links using either PHP or Javascript (for HTML pages). This allows the script to also be used as a download counter or similar
