Clock is a JavaScript generator allowing you to build your own custom clock script. Options include: 4 time sources including Time Zone specific, daylight saving, display on page/status bar/title bar, very customisable time/date output, script output can be short or verbose for educational or debugging purposes, static or dynamic display. Clock is very easy to use. There are hundreds of variations. Add your own HTML for further customisation. *v2.0d Update* More browser compatable plus some bug fixes :)
