CNCat is intended for creating web-resources and articles directory. Now you can manage your web directories more easily and more efficiently! CNCat allows you to: create and manage a directory of links and articles; use categories with unlimited nesting, cross-categories and filters; automatically check links efficiency and backward links availability (CRON also); let users comment and rate links/articles; display statistics; use black/white lists of site URLs; use powerful templates for interface configuration; place banners and insert PHP code on the pages; use fulltext search through the directory; broadcast data to RSS feeds; send automatic e-mail notifications; bring directory management to moderators; backup links, articles and configuration; upgrade directory from previous versions of CNCat (1.x to 4.x); use plugins. CNCat have multi-language interface (English/Czech/Russian/Ukrainian/Bulgarian); Joomla and WordPress editions. Original code open (user interface part).
