Codelock - Is a PHP/HTML Script Encryptor

Address   {value_address}
Contact Person   {value_contact_person}
Mobile Number   {value_mobile_number}
Email   {value_email}

Codelock allows you to encrypt full PHP pages (mixed with HTML and Javascript) including the HTML Output from your scripts. You can distribute your scripts with a password, expiry date and IP lock. Codelock is easy to use and only takes a few minutes to install. Its also cross version compatible and works without any alterations to existing PHP.ini file.
