codeSECURE

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you have 1.sensitive or important scripts, 2.scripts you sell,scripts you want to demo to clients on THEIR servers etc you need codeSECURE, with code secure you can make your scripts look gibberish to the human eye but still run perfectly on any server. Other features include, expire in X number of days,months,years, give software "unlock keys" to clients without which the software wont run and a LOT more...what are you waiting for?? <i>NEW in ver 1.3-encrypt html files too!</i>
