CodeThatForm PRO is the PROFESSIONAL version of the CodeThatForm package. CodeThatForm provides with the way to work with the layers so that they fully mimic the windows. Visual appearance of the windows (caption, work area, system buttons) and methods declared in the package offer the instant ability to create the popups, dialogs, forms within browser actual windows with the extremely hot look and feel. Script is proven to be working with the majority of browsers and comes with the examples of the implementation and the complete documentation.
