

CoffeeCup StyleSheet Maker

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

CoffeeCup StyleSheet Maker allows you to construct full-featured cascading style sheets, giving you full control of text placement, fonts, backgrounds, and more. You just have to change the tag definitions in the CSS file, because each Web page will look to that file for reference in terms of how to set itself up. You'll also be able to overlap text, create links that aren't underlined, place image backgrounds in tables, and even create your own
