

conaito VoiceMail SDK - MP3 Recording Applet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The conaito VoiceMail SDK is a powerful solution for recording and sending voice messages from your websites to any existing Email client software. The recipient receives the usual Email message with a link to Mp3 audio file. He/she can download Mp3 file and listen to it using any existing Mp3 playback program or play it direct from server. The conaito VoiceMail SDK is compatible with Windows 98/2000/2003/ME/XP, MacOS and with cross Browser! Key features: Record, send by Email and play mp3 file direct from website (without any need for an additional player), Recording Level Indicator, NAT (Router) & Firewall friendly (upload recorded Mp3 with HTTP post), Comes with ready-to-run sample, Freely changeable Interface design, Supports multi-language environment, Works on the most popular web browsers and web server, Works with all kinds of Internet connections, Comes with valid Microsoft Authenticode Certificate, No Yearly/Monthly fee, Very easy to incorporate.
