

Considering Different Browsers

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Many times it is necessary to consider the clients browser. Some things are not cross browser compliant. Some things look right in IE but are a little different in NS. The opposite is true as well. By looking at the USER AGENT we can do a little server side scripting to show what is needed depending on the browser. Here is how.
