

Contemplate(tm) Web Templating System

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Contemplate is a PHP-based, open source web templating system that allows writers, designers and developers to focus on what they do best. Store content, design templates and code in separate files, edit them with your favorite tools, then use Contemplate to merge them at runtime.
