Contest Scoreboard lets you run your own regular competitions/sweeps on your web site. It uses a flat file database. Add questions using the intuitive admin interface and let your visitors submit their answers via the auto-generated form, which you can integrate into your design. At any point you can mark the entries quickly and easily by clicking on a correct answer or using keywords. The script is intended for multiple consecutive contests; As you run subsequent contests, a leaderboard is created with the high scores. Full-featured but lightweight script!
