

# Converting normal Date into RFC-822 Format Date using ASP

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Have you ever wanted to format a date in your ASP pages (using VBScript) to conform with RFC-822? These are required for various things but in particular they are required format for dates in RSS feeds. While I was producing some RSS feeds I couldn't find any functions that converted ASP dates to the required formats so I created the following functions to do it for you

For more details, please visit <http://scripts.goclixxy.com/converting-normal-date-into-rfc-822-format-date-using-asp-3223>
