Converting Your existing HTML to XML

Address {value_address}

Contact Person {value_contact_person}

Mobile Number {value_mobile_number}

Email {value_email}

This article explains how to easily migrate HTML pages to XML using HTML Tidy and a COM Wrapper. It discusses a sample conversion of the bookmark file from HTML to XML and then into a browser-neutral tree view. Helpful for sites where a lot of information is maintained as flat HTML pages with their pages sharing similar structure. Supporting source code available for download.
