

Cool Javascript Find On This Page...

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Find on this page function for IE, Chrome, Opera, Android, iPhone, Netscape, Firefox and Safari. Can search forwards and backwards on the page. Jumps to and highlights the found search term. The pop-up is a DIV instead of an actual window so that unintelligent pop-up blockers will not block it. The pop-up DIV always stays in view even if the page scrolls. Added mouse functions to be able to move the DIV around the screen with the mouse. Added keyboard functions so the user can press ENTER to search for the next occurrence of the word or term.
