

Copy Text To Clipboard

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This simple console application copies the first parameter to the Windows clipboard. If no parameter is given, an empty string is copied to the clipboard, i.e. everything is erased on the clipboard. This application is based on another project of mine -- Copy Path To Clipboard --, but even simpler.
