

Count Visits with Cookies - Send User To Correct Page

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This JavaScript example counts the number of visits to this site (page). It uses that information to send the user directly to the correct page on the site (via a parameter). A test-only variable should be set to false to turn off the test mode.
