

# Creating a file upload system

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

In this tutorial I will show you how to create a simple file upload system with your user can upload a file from the local computer to your web server. As you will see it is not so complicated to implement this very useful script.
