

# Creating an Event Manager in CakePHP

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The main idea of our tutorial is to create a simple Events Manager using CakePHP. Our project will: \* Create / Update / Deleting events with or without attached location (This is often called a CRUD style application) \* Create / Update / Delete locations \* Show all events in a list view or calendar view \* Provide an RSS feed for all events
