

# Creating Dependent Select Objects With ASP

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

Select boxes must often communicate with one another (i.e., a Child select object's option values depend on the value selected in the Parent object). This tutorial details how to create a hierarchy of select objects using ASP, SQL, ADO, and JavaScript.
