

Creating Dynamic JavaScript with ASP and Databases

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial explains how to put ASP tags inside of JavaScript blocks so developers can fit large amounts of data into one form on a single page. It provides an overview of things that can be done with dynamic JavaScript with ASP and data queries. Example source code available for download.
