A nice utility for genealogy sites to offer to their visitors who do census record searches. This Convenient SoundEx generator form may be displayed inline with your page content or you may provide a link to let your visitors pop it up into a small window. The form displays both the normal census codes as well as special census codes (produced in some censuses prior to 1920) simultaneously as the user types the word. A great (and free) little widget to offer to your genealogy site visitors.
