<b>Email</b>	{value_email}

Cross-Desktop is a browser or web based desktop allowing to handle remote computers from the distance in the same way than to handle a local computer with just a standard browser. Remote computers can be any of servers, pc or mainframes. Email Client, File Explorer and RSS Reader All-In-One. With Cross-Desktop you can manage Bookmarks, read RSS Feeds, treat Zip Archives as regular directories, edit Text Files and many more. It integrates a functionally complete Email Client and a URL-Download feature for file transfer based on a url. It's simply your personal information manager! (PIM) And it's virus safe! Ideally suited for web inquires and mobile data management: # RSS Reader supporting RSS und RDF format. # Email Client with filter technique, virus safety, account management etc. Maintain unlimited number of mail accounts. # URL-Download function for easy web inquiry without complicated up and download. # Anywhere available as of web technology. Windows users require the Cygwin Linux like shell to run Cross-Desktop.
