CrosswordMaker is a simple crossword puzzle maker and grader. It will lead you through a series of steps to create a crossword puzzle, then make the puzzle up as an HTML page that the program can grade later. It will only tell you if the entire puzzle is correct or not: there is no detailed information in the grading about where you might have gone wrong. The program does not auto-generate a puzzle: rather, it gives you, the creator, complete control over every square to let you design the exact puzzle you want.
