

## CS Email Package

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The CoolServets.com Email package is a group of classes that makes it easy to send email from any Java application, applet or servlet. Features include: Simple to include in a Java app, applet or servlet, Uses SMTP to send email, Includes support for CC and BCC fields, Supports Reply-To field, and Models the JavaMail API (so programmers familiar with JavaMail will be able to adapt this package for their use quickly).
