csNetUpload

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is an ASP.NET class that saves files uploaded through an HTTP post. It can save to disk or export the files as a byte array or a MemoryStream. The code runs on the server and requires no dependent code in the client. It is suitable for use with HTTP file posting controls. There is a fully functional free trial available.
