

CSS sprite class

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class can be used to generate sprite images and CSS to use image styles to use the sprites in Web pages. It can take a list of images and generates a single sprite image with all the images inside. The class can also generate CSS style definitions to use in Web pages that need to use the images from the generated sprite image.
