

CsvFileSearch

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Csv File Search provides you with an easy to use application that enables you to search for multiple CSV documents in a user-defined location on your hard disk. Csv File Search scans a specific folder for CSV files and displays the results in a table, enabling you to view their content, even if the CSV files are of different types. The column title in the first row is used as a heading for the search result block.
