

Custom Product Preview for Magento

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Custom Product Preview enables your customers to create a preview of the end-product by placing their custom image over your product image. This easy-to-use and intuitive tool can provide you with an image that serves as an agreement with your customer of what the end-product should look like. It also helps to make sure that customers are aware of your requirements for files that will be used in production. This is a must-have for stores that sell products with custom graphics, such as T-shirts, mugs, mouse pads, etc. As Admin, you will be able to upload a background image that represents the custom product and define the printing area, and your customers will be able to upload and position their images that are to be printed, embroidered, etc. on your products. Full list of features is available on the product page.
