

CustomError for IIS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Customized 404 and other default error pages improve user experience and reduce abandonment rates by maintaining the look and feel of your site and offering alternate page destinations. Unfortunately, setting them up in Microsoft IIS usually requires something many developers lack - access to the Web server's administrative interface. But with Port80's CustomError for IIS, simply upload them to a designated directory. Try a free 30-day trial.
