CwVideo – A Toolkit to handle HTML 5 video <http://www.chipwreck.de/blog/software/cwvideo/> A toolkit to use and control HTML5-video with the current mootools release – and two extensions of Fx.Slider: A video timeline and a volume slider. What is this plugin about? First at all it extends the current (1.24) mootools release to handle the new HTML5 video-tag. So you can easily access a videos properties and control the video in a mootools-like way. Furthermore it contains two extensions to the Fx.Slider class from mootools: CwVideo.Volumeslider creates a volume slider CwVideo.Timeline for a timeline slider with several features to simplify creating your own video controls. Features Simplify video control Timeline Controller (Timeslider) Volume Slider
