Dan's Sales Tax Calculator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script will calculate sales tax. If you enter an all inclusive price, it will calculate how much your company takes and how much goes to the government. If you enter a price excluding tax, it will show you how much IVA is due. There is just one variable to configure which is the sales tax rate applicable in your country. All calculations are integerised.
