Dansie Anti Spam

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A server-side anti-spam email filtering solution. Moves spam out of your pop email account and into a quarantine file so you don't have to download or read it. Powerfully accurate filters you define and control through a web browser. Filters are based upon a "point system" where bad words or phrases get negative points and good words or phrases get positive points. Messages scoring below the Quarantine Score Limit will be quarantined. You control all the words/phrases, points and scoring.
