Dansie Shopping Cart Mall Version can handle an unlimited number of merchants simply by creating extra directories in your cgi-bin with the respective merchants names. Each merchant can have the cart speak the language of their choice, their own custom variables, own real-time credit card processor, etc. Orders will be emailed directly to the individual merchant. It also has a built-in web based upload utility feature that allows merchants to login and upload their files 24 hours a day with their web browser.
