

# databinding

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

databinding.js was created out of the need to bind complex XML to HTML controls. This version was tested on WinXP and Windows 2000 with IE 6 AND IE 5.5. Note: this will only run with Internet Explorer. Included in the zip file is an example HTML file which shows how to use the dataBinding function.
