

DatePickerControl

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Features * Fully JavaScript * Automatic input control conversion with a single attribute in the input tag, or using a special id attribute. For example: <input type "text" name="edit1" id="edit1" datepicker="true"> and that's all! * Multiple date formats. * Layered calendar, without annoying pop-up windows. * Mouse and keyboard navigation. * Variable first day of week. * Many config params. * CSS support. * GPL License. Works with Mozilla family and IE.
