<b>Email</b>	{value_email}

The DB Backup Tool is a free and easy to install script, which allows to create easily backups and generate dumps of MySQL databases. It can also compress the database backups and create zip files and also send them by email. DB Backup Tool has a responsive and password protected administration panel with an easy to use interface for managing the settings and creating a backup with just clicking on the database name. It's written in PHP and it's provided with the full not encrypted sources, so it can be possible to modify it or include it in your web projects.
