DBF Script is a powerful tool which allows you to create small programs (scripts) to manage dbf files. It is useful for the programmers who want to make something special with DBF files. In DBF Script you can create new, edit existing, print and run scripts. Multi-language architecture allows you to use several languages (PascalScript, C++Script, BasicScript, JScript). In DBF Script you can create new, edit existing, print and run scripts.
