Dead Link Checker

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script will check the availability of all the image url's in your database. If it finds that one of the images isn't available it will "suspend" the user's account and send an email notifying the user that their account has been suspended. It's very easy to use.....just upload it to your admin directory and view the page in your browser. The script takes care of the rest.
