

# Dealer Locator

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

E-commerce stores are not only located in one place, they sometimes have stores in different locations or they have dealers in multiple places. Thus, it is very important to provide customers a tool to find which place is the nearest to them. Dealer Locator is developed based on this ideal to become a helpful module which helps customers save their time and distance of getting products. In the backend, your admin is allowed to import dealers information from CSV files included Dealer title, email, phone, postal code, address and Google map information which support for searching of customers. In the frontend, customers can find their nearest dealer by postal code, street name, city, state or country. The location found will be shown in Google map which help customers easier to imagine the locations.
