Delivery Date and Notice

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Without adding any extra pages to the checkout process, our Delivery Date and Notice Magento module provides new options for your customers. By filling in two fields, they can choose their preferred delivery arrival dates as well as leave a message for their postal or delivery person. Best of all, your customers will be instantly informed as to any dates when delivery is unavailable to them (i.e., weekends, holidays, recurrent days of the week, isolated days). It's the perfect way to effectively increase your customer service! The Delivery Date and Notice extension includes configuration that allows you to set other parameters aside from the most convenient delivery schedule for you and your customers. You can also specify a minimal interval between the order and delivery date (such as 3 days, one week, etc.) Adding these settings to your store takes very little time and provides incredible value!
